Shooters receive 35 bonus points for each match attended.

***Match Average** shows the average points for the matches that the **shooter has attended**. This can be misleading because if a shooter only attends one match, and that match is a 800 point match, and the shooter scores 685 points, their match average would be 685. If another shooter wins and never misses a target for 3 matches, but all three matches are only 600 points total, that shooters match average would only be 600. Match average does not necessarily represent the best shooter and should only be used as a guide for personal progress.
